

**Karl's Tree Trimming Service practices deep root tree fertilization that will maintain your beautiful trees. Find out how this method of tree fertilization can benefit your trees.**

Deep root fertilizer is the only way to go.

Tree fertilizing is an excellent way to maintain the long-term health of your tree. That's why Karl uses the deep root method of tree fertilization, that allows him to inject quality fertilizer directly into the root system of the tree. There are many tree species that can greatly benefit from deep root fertilizing. Sometimes a good shot of fertilizer can be the difference between a tree's life and death. Give your tree the nutrients it needs to thrive.

Call Karl and he'll mix up the perfect fertilizer for your tree.
