

Karl's Tree Trimming Service has been providing Tucson with high-quality mulch for over 18 years. Read on to learn more about Karl's signature mulch.

Mulch looks a whole lot better than dirt.

All of Karl's mulch is a product of the work he does in and around Tucson. It's a local, quality and sustainable product that can provide your yard or garden with the boost it needs.

Does your “yard” consist of dirt? Dirt is definitely not something we are lacking here in Tucson, but mulch is a great alternative. It looks better, cuts down on dust and encourages better soil.

Is your flower bed looking wilted and withered even though you seem to be watering all the time? Mulch is a great solution to that problem, too.

Mulch is great because it:

- helps control weeds
- maintains soil temperature
- maintains soil moisture (less watering)
- provides better soil aeration and drainage

Mulch also promotes tree health. As Tucson grows it becomes more urban and the trees are exposed to the ill effects of hot pavement, compacted soil and poor irrigation. Mulch is great way to support tree health, even when it's not in the best of environmental conditions. Mulch gives your tree the things it needs to survive, especially in our harsh climate. Mulch is one of those great products that serve an integral purpose in human life, but also supports the environment.

Karl's Tree Trimming Service has a wide range of different mulch, which allows for variety and choice. His powerful Vermeer grinder is capable of grinding up the perfect mulch for any yard, garden or property.

Call today to request your mulch delivery and improve the overall health and appeal of your yard and/or garden.
