

Karl's Tree Trimming Service is experienced in palm removal, palm trimming and palm shaving. Karl knows how to take care of these majestic trees of Tucson.

Palm Removal

In a city like Tucson, where there is a palm tree on almost every corner, it is inevitable that they die and unfortunately this last frigid winter didn't help. Karl and his team have the equipment and necessary experience to remove your palm tree with the utmost care and safety. If you want to replace your palm after its removal, Karl is happy to help with that, too.

Palm Trimming and Shaving

Anybody who has a palm tree in Tucson knows that it can be a pain to maintain. Many have cut themselves more than once trying to do the work themselves. Let Karl and his experienced team perform all your palm trimming and palm shaving. He can do it faster, safer and at an affordable price. If your palm fronds are hanging over onto your garden path, sidewalk or driveway, get Karl and his team to cut it back. A palm trimming and shaving is not only a great way to get rid of the nuisance of stray, dead palm fronds, but it is also crucial for your palm tree's health and growth.

Although palm trees seem to be invincible because they can stand the Tucson heat, they are sensitive and need to be handled with care. If palm trimming is not done correctly it can lead to:

- loss in vigor
- reduction in nutritional health
- transmission of disease
- lowered tolerance of cold and windstorms

For this reason, you should always get a professional with years of experience to perform the palm trimming and palm shaving necessary to keep your palm in good health.

Whether you need a palm removal or palm trimming, Karl's Tree Trimming Service can help you quickly, effectively and at a price you can afford.
